Take Control of Your Inbox

Spam Arrest Enterprise Solutions

*A Cost-Effective Way to Control
Spam Within Your Organization*

Spam Arrest Enterprise Solutions

Try Spam Arrest Enterprise FREE for 30 Days!

Before using Spam Arrest, 90% of our customers tried a spam filter on their inbox, yet spam still got through. Spam Arrest protects your mailbox from 100% of spam with a patented method for verifying relationships between you and your valued contacts, making email safe for everyone. Spam Arrest's enterprise Solution is the easiest, most cost-effective way

for organizations to utilize Spam Arrest's spam Protection service.

In the enterprise scenario, all incoming email messages to your domain(s) are first routed to servers at Spam Arrest's datacenters. Messages sent to non-protected accounts are immediately forwarded to your organization's SMTP server. Messages sent to protected accounts are processed at Spam Arrest, and only messages from verified senders are forwarded to your SMTP server.

Spam Arrest Enterprise Solutions

5000 Users or above.....	Please contact us

In addition to the monthly fees above, there is a one-time setup fee of \$49.95, which is billed after your first month of service.

Spam Arrest Enterprise Solutions

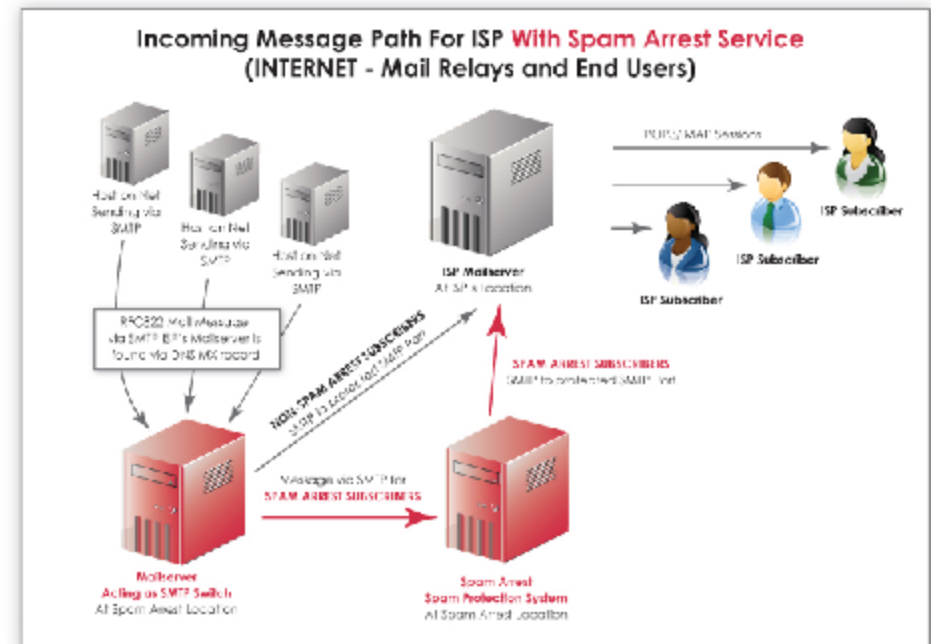

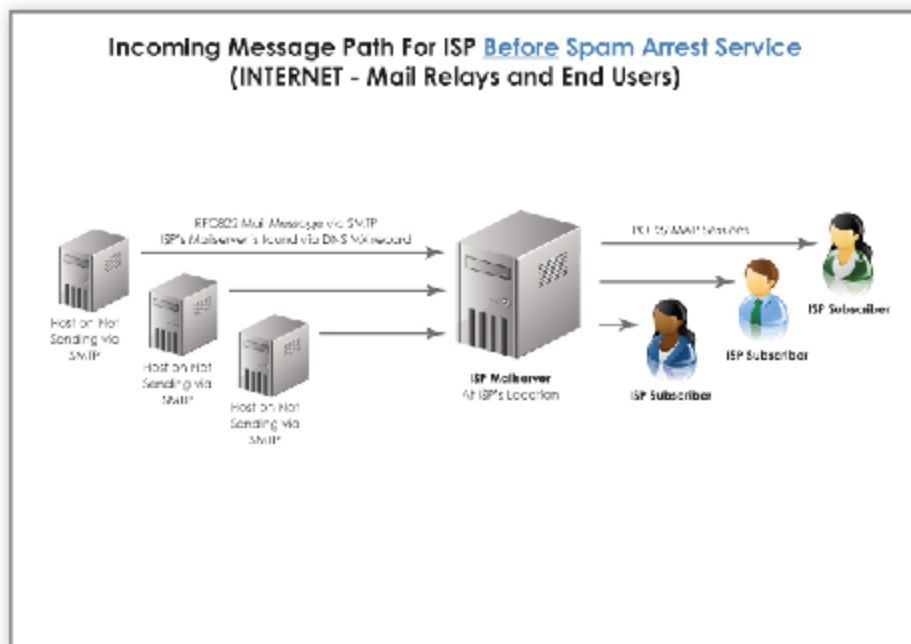

How Spam Arrest Works

When email is sent to you, it travels across the Internet to your Mail Server (POP Server). Your email program (such as Outlook, Eudora, Outlook Express, etc.) connects to this Mail Server and downloads your email.

Once you subscribe to Spam Arrest, Spam Arrest logs into your existing mail server and moves all the email to Spam Arrest's servers every two to five (2 to 5) minutes. Your email program is reconfigured to download your email from the Spam Arrest Mail Servers, after it is filtered based on the Challenge-Response verification process. Your email program downloads only the approved emails, while the spam is stored in your Unverified Folder on our web site for 7 days until it is automatically deleted. See flow chart to the right to learn more about how Spam Arrest works.
